Education

- **2025 - 2026: Bachelor 3rd Year (L3) Psychology at the University of Strasbourg.**
- **2024 - 2025: Bachelor 2nd Year (L2) Psychology at the University of Strasbourg.** I started my Psychology degree as a mature student. Achieved a "Fairly Good" grade, ranking within the top 6% of highest averages.
- **2009 - 2011: M.Sc. in Software Engineering at the Technical University of Denmark.**
- **2007 - 2009: Engineering Degree, École Centrale de Lille.** I received my general engineering degree from École Centrale de Lille.
- **2005 - 2007: Preparatory Class for "Grandes Écoles",** Specialization Math/Physics, Lycée Camille Guérin in Poitiers

Professional Experience

- **May - August 2025: Airbnb Host in Strasbourg.** I hosted travelers in the apartment where I lived, which had 4 rooms for rent. I welcomed 130 travelers or couples. I handled check-ins, ensured communication, cleaned, prepared rooms, made improvements, and cohabited with guests. I learned to be in a welcoming position and to give guests space while remaining available. I received many very positive reviews and constructive criticism that helped me grow.
- **2022 - 2025: Part-time Somatic Therapy Practitioner.** In parallel with my training, I worked with clients, some regularly for over a year. This allowed me to deepen my reflection on psychotherapy. Worked on strong critical voices with one client. Worked to increase another's ability to feel their emotions.
- **2015 - 2022: Software Developer.** I worked in Germany and Sweden, in startups and in video games, notably at *Ubisoft* for the video game *Avatar: Frontiers of Pandora*. Worked in English, in international teams, collaborating with developers, artists, and managers.
- **2011 - 2015: Research and Teaching Assistant at the Technical University of Berlin.** I worked on computer science research projects and published an article in an international journal. I was an assistant for teaching bachelor's and master's courses.

Psychotherapy Training

- **2024 - 2025: Hakomi Somatic Mindful Psychotherapy Professional Training Level 2, Hakomi Institute of California (online).** Second level of practical training in somatic therapy for developmental trauma. Transformation and integration processes, working with transference in mindfulness, Lowen's character model (derived from psychoanalytic classifications).

- **2023 - 2024: Hakomi Professional Training Level 1, Hakomi Institute of California (online).** Focus on the therapeutic relationship, tracking the patient's experience and somatic indicators of the unconscious. Mindfulness exploration and transformation of unconscious processes. Training delivered over 7 weekends with supervised practice.
- **2022: Certificate in Somatic Attachment Therapy, Embody Lab.** I completed this specialized course focusing on attachment theory and mastering Focusing, a method invented by Eugene Gendlin. Knowledge of the presentation of attachment disorders and therapeutic postures adapted to different attachment styles. Training accompanied by twenty hours of practice with other participants.
- **2020 - 2021: Transpersonal Psychology and Hypnotherapy, Tallinn, Estonia.** I studied the basics of therapy during seminars for one semester. History of therapy: Freud, Jung, Adler. Ericksonian Hypnosis, Neuro-Linguistic Programming, Family Constellations, Active Imagination.

Personal Work and Healing

- **2019 - Present: Personal Psychotherapy.** I have been, with varying degrees of regularity, in therapy since 2019; I have worked with transpersonal or somatic therapists (sensorimotor, Hakomi). I have worked on strong feelings of shame, suicidal thoughts, childhood traumas with difficult transferences and quite deep regressions.
- **2020 - Present: Embodiment, Bodily and Relational Awareness.** I have explored practices of Bodily Awareness or *Embodiment*, as well as relational practices. These approaches have allowed me to contain traumas, learn to regulate my emotions, decenter myself, become aware of my habits in relation to others, especially the opposite sex. Bodily Awareness is becoming an important theme in CBT, following Damasio's theory of somatic markers.
- **2016 - 2018: Meditation and Mindfulness.** I regularly practiced mindfulness meditation and participated in 2 Vipassana meditation retreats. These methods are at the origin of third-wave CBT mindfulness. They taught me to step back from my thoughts, observe the connection between emotions and thoughts, and manage addictive behaviors (smoking).

Languages

- **English:** Fluent and professional proficiency.
- **German:** Intermediate level (B1), **Swedish:** Fluent level (B2)

Activities and Engagements

- **Relational and Somatic Practices.** For several years, I have participated in workshops on relational practices such as *Authentic Relating* and *Circling*. I have also had the opportunity, on several occasions, to lead conscious movement or mindfulness workshops.
- **Contact Improvisation Dance.** I practice 'contact improvisation' dance and am sometimes also involved in organizing events at the association level.
